Index to Volume 35

- A combined symbolic and numerical algorithm for the computation of zeros of orthogonal polynomials and special functions, 465
- A database of categories, 127
- A matching pursuit technique for computing the simplest normal forms of vector fields, 591
- A new elementary algorithm for proving q -hypergeometric identities, 293
- A result on braids via the investigation of a rewriting system, 169
- ALUFFI, P., Computing characteristic classes of projective schemes, 3
- An algorithm for computing invariants of linear actions of algebraic groups up to a given degree, 441
- An algorithm to compute the primitive central idempotents and the Wedderburn decomposition of a rational group algebra, 673
- An algorithm to compute the set of characteristics of a system of polynomial equations over the integers, 269
- An elementary approach to subresultants theory, 281
- An orderly linear PDE system with analytic initial conditions with a non-analytic solution, 487
- Applications of SAGBI-bases in dynamics, 543
- ARNOLD, E.A., Modular algorithms for computing Gröbner bases, 403
- Automorphism group computation and isomorphism testing in finite groups, 241
- BAINES, R. and VÁMOS, P., An algorithm to compute the set of characteristics of a system of polynomial equations over the integers, 269
- BAYER, T., An algorithm for computing invariants of linear actions of algebraic groups up to a given degree, 441
- BROOKSBANK, P.A., Constructive recognition of classical groups in their natural representation, 195
- BROWN, R. and WENSLEY, C.D., Computation and homotopical applications of induced crossed modules, 59
- BURCKEL, S., A result on braids via the investigation of a rewriting system, 169
- BUSH, M.R., LEEMING, M. and WALTERS, R.F.C., Computing left Kan extensions, 107
- CANNON, J.J. and HOLT, D.F., Automorphism group computation and isomorphism testing in finite groups, 241
- Cohomology, stratifications and parametric Gröbner bases in characteristic zero, 527

doi:10.1016/S0747-7171(03)00152-4

- Computation and homotopical applications of induced crossed modules, 59
- Computer analysis of periodic orbits of discontinuous vector fields, 617
- Computing characteristic classes of projective schemes, 3
- Computing left Kan extensions, 107
- Constructive recognition of classical groups in their natural representation, 195
- Deciding the guarded fragments by resolution, 21
- DE NIVELLE, H. and DE RIJKE, M., Deciding the guarded fragments by resolution, 21
- Distributed Maple: parallel computer algebra in networked environments, 305
- Double Sylvester sums for subresultants and multi-Schur functions, 689
- Effective use of Boolean satisfiability procedures in the formal verification of superscalar and VLIW microprocessors, 73
- EL KAHOU, M., An elementary approach to subresultants theory, 281
- FLEMING, M., GUNTHER, R. and ROSEBRUGH, R., A database of categories, 127
- GATERMANN, K., Applications of SAGBI-bases in dynamics, 543
- GIL, A. and SEGURA, J., A combined symbolic and numerical algorithm for the computation of zeros of orthogonal polynomials and special functions, 465
- Implementing finite structures in Mathematica via a skeletal topos of finite sets, 137
- JACQUEMARD, A. and TEIXEIRA, M.A., Computer analysis of periodic orbits of discontinuous vector fields, 617
- JARRAH, A.S., LAUBENBACHER, R. and ROMANOVSKI, V., The Sibirsky component of the center variety of polynomial differential systems, 577
- KOEPE, W. and GATERMANN, K., Preface to Computer algebra and computer analysis, 463
- LASCOUX, A. and PRAGACZ, P., Double Sylvester sums for subresultants and multi-Schur functions, 689
- LEMAIRE, F., An orderly linear PDE system with analytic initial conditions with a non-analytic solution, 487
- Linear recurrent sequences and polynomial roots, 637
- LITTLE, J.B., ORTIZ, D., ORTIZ-ROSADO, R., PABLO, R. and RÍOS-SOTO, K., Some remarks on Fitzpatrick and Flynn's Gröbner basis technique for Padé approximation, 451
- LIU, J., LIU, Z. and WANG, M., The term orderings which are compatible with composition II, 153
- MIGNOTTE, M. and ȘTEFĂNESCU, D., Linear recurrent sequences and polynomial roots, 637
- Modular algorithms for computing Gröbner bases, 403
- MORA, T. and SALA, M., On the Gröbner bases of some symmetric systems and their application to coding theory, 177
- MULDERS, T. and STORJOHANN, A., On lattice reduction for polynomial matrices, 377
- NIEFIELD, S.B., Implementing finite structures in Mathematica via a skeletal topos of finite sets, 137
- OLIVIERI, A. and DEL RÍO, Á., An algorithm to compute the primitive central idempotents and the Wedderburn decomposition of a rational group algebra, 673
- On lattice reduction for polynomial matrices, 377
- On the Gröbner bases of some symmetric systems and their application to coding theory, 177

- On the normalization of numbers and functions defined by radicals, 651
- Preface to Computer algebra and computer analysis, 463
- Publisher's Note, 1
- qMultiSum—a package for proving q -hypergeometric multiple summation identities, 349
- RIESE, A., qMultiSum—a package for proving q -hypergeometric multiple summation identities, 349
- RONEY-DOUGAL, C.M. and UNGER, W.R., The affine primitive permutation groups of degree less than 1000, 421
- RYBOWICZ, M., On the normalization of numbers and functions defined by radicals, 651
- SCHREINER, W., MITTERMAIER, C. and BOSA, K., Distributed Maple: parallel computer algebra in networked environments, 305
- Some remarks on Fitzpatrick and Flynn's Gröbner basis technique for Padé approximation, 451
- The affine primitive permutation groups of degree less than 1000, 421
- The integration of systems of linear PDEs using conservation laws of syzygies, 499
- The Sibirsky component of the center variety of polynomial differential systems, 577
- The term orderings which are compatible with composition II, 153
- VELEV, M.N. and BRYANT, R.E., Effective use of Boolean satisfiability procedures in the formal verification of superscalar and VLIW microprocessors, 73
- WALTHER, U., Cohomology, stratifications and parametric Gröbner bases in characteristic zero, 527
- WOLF, T., The integration of systems of linear PDEs using conservation laws of syzygies, 499
- YU, P. and YUAN, Y., A matching pursuit technique for computing the simplest normal forms of vector fields, 591
- ZHANG, B-Y., A new elementary algorithm for proving q -hypergeometric identities, 293

Index to Volume 36

- A calculus combining resolution and enumeration for building finite models, 49
- Algorithms for computing sparsest shifts of polynomials in power, Chebyshev, and Pochhammer bases, 401
- Algorithms to compute the topology of orientable real algebraic surfaces, 343
- An algorithm to find a coordinate's mate, 835
- An alternative approach to comprehensive Gröbner bases, 649
- ARMANDO, A. and RANISE, S., Constraint contextual rewriting, 193
- Automated short proof generation for projective geometric theorems with Cayley and bracket algebras I. Incidence geometry, 717
- Automated short proof generation for projective geometric theorems with Cayley and bracket algebras II. Conic geometry, 763

- AVENHAUS, J., HILLENBRAND, TH. and LÖCHNER, B., On using ground joinable equations in equational theorem proving, 217
- Bases for projective modules in $A_n(k)$, 845
- BAUMGARTNER, P. and ZHANG, H., Preface to First order theorem proving, 1
- BECKERT, B., Depth-first proof search without backtracking for free-variable clausal tableaux, 117
- BELINFANTE, J.G.F., Computer proofs about finite and regular sets: the unifying concept of subvariance, 271
- BERSON, J. and VAN DEN ESSEN, A., An algorithm to find a coordinate's mate, 835
- Canonical comprehensive Gröbner bases, 669
- CHEN, F. and WANG, W., Revisiting the μ -basis of a rational ruled surface, 699
- CHTCHERBA, A.D. and KAPUR, D., Exact resultants for corner-cut unmixed multivariate polynomial systems using the Dixon formulation, 289
- Complexity results for triangular sets, 555
- Computer proofs about finite and regular sets: the unifying concept of subvariance, 271
- Computing all parametric solutions for blending parametric surfaces, 925
- Computing in algebraic geometry and commutative algebra using *Macaulay 2*, 595
- Constraint contextual rewriting, 193
- Constructing Lie algebras of first order differential operators, 685
- DEGTYAREV, A., NIEUWENHUIS, R. and VORONKOV, A., Stratified resolution, 79
- Dense resultant of composed polynomials Mixed–mixed case, 825
- Depth-first proof search without backtracking for free-variable clausal tableaux, 117
- DICKENSTEIN, A. and EMIRIS, I.Z., Multihomogeneous resultant formulae by means of complexes, 317
- DRAISMA, J., Constructing Lie algebras of first order differential operators, 685
- Early termination in sparse interpolation algorithms, 365
- Exact resultants for corner-cut unmixed multivariate polynomial systems using the Dixon formulation, 289
- Factoring systems of linear PDEs with finite-dimensional solution spaces, 443
- Fast computation of discrete invariants associated to a differential rational mapping, 473
- FORTUNA, E., GIANNI, P., PARENTI, P. and TRAVERSO, C., Algorithms to compute the topology of orientable real algebraic surfaces, 343
- GAGO-VARGAS, J., Bases for projective modules in $A_n(k)$, 845
- GAO, X-S., Implicitization of differential rational parametric equations, 811
- GEORGIEVA, L., HUSTADT, U. and SCHMIDT, R.A., Hyperresolution for guarded formulae, 163
